

Metalglow™

FULL RANGE OF UV CURABLE AND WATER-BASED METALLIC INKS FOR PRINTING PAPER AND SYNTHETIC SUBSTRATES

Wide range of metallic inks with:

- Good gloss and brilliance
- Adhesion to many substrates
- Range of printing processes
- High printing speed

Metalglow™ is available in:

- Metalglow™ L (MUL) - UV letterpress & UV offset metallics
- Metalglow™ F (MUF) - UV flexo metallics
- Metalglow™ S (MUS) - UV screen metallics
- Metalglow™ W (MWH) - Water-based flexo metallics

All Metalglow™ are supplied press ready.

Suitable for a wide range of applications

- Self adhesive labels (coated & uncoated papers, PE and TC polypropylene)
- Tickets/tags/boards
- Can be used in combination with other ink technologies
- Can be overprinted with thermal transfer ribbons (dependent upon type)
- Can be used for both surface and reverse printing

PROPERTIES	BENEFITS
• Range of technologies	• Flexibility to the printer
• Good press stability	• Consistency during print run
• Good curing and drying	• Fast print speeds achievable
• Optimum viscosity and flow	• Good printability

The aim of our technical documents is to inform our customers about general values. However, the transferability of general values known from experience and laboratory results to concrete practical applications depends on a number of factors which are beyond our control. We therefore ask for your understanding that this advice document cannot be used as the basis for claims in law. Furthermore, the correct application for each product has to be checked carefully for suitability. For application details refer to Technical Data Sheet.
