501 SPOT COLOURS

PRODUCT CODE	Red 11005629 Green 11005630 Blue..... 11005631 Orange 11005632 Reflex..... 11005248
DESCRIPTION	SupaSet 501 Spot colour inks are designed to match solid overtrap & common process colour configurations in a CMYB sequence. As with their matching process series, SupaSet 501 Spot inks are designed to penetrate paper stocks quickly to reduce marking and set-off while displaying excellent lay and trap characteristics. The system is made from a predominantly mineral oil based vehicle system and is most specifically suited for knifing to presses with undershot ducting, but can also be pumped from drums.
FEATURES	*Fast paper penetration *Excellent rub resistance *Robust lithographic performance *Strong colour development *Smooth lay and trap in solid print areas *Sharp dot reproduction
PACKAGING	200kg straight sided drums and 14kg pails.
SUBSTRATE	Newsprint, improved newsprint and other uncoated paper stocks
WASH UP	Hydrocarbon based washes, such as Varn Journal Wash or Varn Web Wash, are recommended.
FOUNTAIN SOLUTIONS	The Varn Media Fount range is recommended. SupaSet 501 Spot colours are also suitable for use with most acid, alkali or neutral founts. <i>Contact your Flint Group representative for the most suitable fount for your system.</i>
PLATES	Suitable to be used with all types of negative, positive and CtP plates.
BLANKETS	DayGraphica News Printer range of blankets is recommended. <i>Contact your Flint Group representative for the most suitable blanket for your press.</i>
INK ADJUSTMENT	SupaSet 501 spot colours are press ready and require no adjustment.
HEALTH & SAFETY	SupaSet 501 spot colours are classed as non dangerous goods. For further information refer to the MSDS for the product.
