## 624 PROCESS COLOURS

Magenta 11005322   Cyan 11005323   DESCRIPTION The Newsman 624 series of process colours were developed specifically for use in the News Limited Group. They are designed on a "single phase" vehicle system to enable fast penetration of news print stocks which facilitates less marking through the press, and enabling more efficient printing of back to back colour, particularly through CIC units.   FEATURES *Fast paper penetration *High colour density "Sharp dot reproduction *Smooth solids "Robust lithographic performance *Excellent rub resistance *Low mist levels *Available in pumpable grade only   PACKAGING 1200kg tote tanks & 200kg straight sided drums.   SUBSTRATE Newsprint, improved newsprint and other uncoated paper stocks   WASH UP Hydrocarbon based washes, such as Varn Journal Wash or Varn Web Wash, are recommended.   FOUNTAIN SOLUTIONS The Varn Media Fount range is recommended. Newsman 624 colours are also suitable for use with most acid, alkali or neutral founts. <i>Contact your Flint Group representative for the most suitable fount for your system</i> .   PLATES Suitable to be used with all types of negative, positive and CtP plates.   BLANKETS DayGraphica News Printer range of blankets is recommended. <i>Contact your Flint Group representative for the most suitable blanket for your press</i> .   INK ADJUSTMENT Newsman 624 colours are press ready and require no adjustment.
