# M R C

Metering roller cleaner

Powerful degreaser for bareback dampeners

## Product Features

- Varn MRC is a water miscible formula
- High flashpoint, no Dangerous Goods classification
- Blend of solvents effective on all conventional inks; also UV cure\* and hybrid inks

## Advantages of M R C

- Contains emulsifiers, so water can be used to rinse away MRC after wash up and any dissolved residue from printing, including ink, paper dust, fount salts and gum, and spray powder
- Formulated to clean the roller thoroughly without harming the rubber, restoring a surface perfect for transferring water
- Uses high flashpoint solvents, whose slower evaporation rate means more economical use – solvents do not flash off so rapidly, remaining on the rubber surface to dissolve ink

\* includes UV cured newsink e.g. Flint Group Arrolith.  
Not suitable for EPDM rollers
