UV-10 Wash

Blanket & roller wash

High performance blanket & roller wash for dedicated UV systems

Product Features

- Water miscible formula
- Effective on UV cure* and hybrid inks
- High flashpoint, no Dangerous Goods classification
- Special blend of solvents enhances cleaning performance beyond regular UV washes
- For both automatic systems and manual washup

Advantages of UV-10 Wash

- Contains emulsifiers, so water can be mixed into the wash to clean solvent-soluble residue and water-soluble residue
- Formulated to quickly clean the blanket or roller thoroughly of either hybrid inks or UV cured inks* without harming the rubber surface
- Uses high flashpoint solvents, whose slower evaporation rate means more economical use – solvents do not flash off so rapidly, remaining on the rubber surface to dissolve ink

* includes UV cured newsink e.g. Flint Group Arrowlith.
Not suitable for conventional inks
