*FOGRA is a Graphic Technology Research Association whose main purpose is to support the printing industry in the fields of research, development and application, and to transfer the results to the printing industry for practical use. Approval testings conducted by FOGRA in cooperation with press manufacturers (including Heidelberg, KBA and manroland) for print chemicals, including fountain solutions and washes, provide the highest possible protection and assure compatibility with press materials. These approvals ensure that the chemicals being used meet press manufacturer specifications.
