

dayGraphica t3000

The proven leader in printing sleeve technology

Flint Group helped launch a revolution in the design of high-speed web press image transfer products with the dayGraphica t3000 tubular printing sleeve. Our uncompromising commitment to improved performance has made today's t3000 sleeve the worldwide sales leader!

Extra care is taken to assure that all dayGraphica t3000 sleeves arrive in your printing plant ready to run. Each one is hand packed in specially designed cartons which protect the sleeve by suspending it in the carton. While dayGraphica t3000 sleeves are tough on press, they deserve gentle handling during unpacking and installation.

The dayGraphica difference means every t3000 sleeve you get comes backed by the largest and most technically qualified support team in the business. We always work harder to help make your press operators look good on paper!

Features

Ground and buffed surface layer.

Unique carcass construction.

Solvent resistant rubber surface compound.

Benefits

t3000's unique surface finish ensures consistent gauge and uniform web feed for top quality printing.

The durable combination of fabric and compressible layer technologies ensures long life and excellent stability on press. Superb smash recovery for longer life - less downtime, more production.

Proven technology for heatset and coldset applications.

Specifications

Colour:

Blue

Surface:

Ground

Thickness:

Various

Hardness:

78° Shore A

Compliance:

40 - 50 Typical

Face Compound:

Solvent resistant rubber blend

Optimise your on-press performance

Over the years, Flint Group's printing technologists and pressroom chemists have learned the dynamics between printing blankets, inks and pressroom chemicals play a vital role in on-press performance and profitability. And they've learned how to analyse these dynamics to help printers resolve problems and optimise their printing results.

Our laboratory experts, technical support team and sales consultants work together with printers to recommend the right combination of pressroom products to achieve optimum performance. A consultative service offered only by Flint Group.
