

# dayGraphica RM70

## Specially designed for the Manroland REGIOMAN newspaper press

Introducing a new class of eight-page newspaper presses – the REGIOMAN, the world's first double-width, single circumference, eight-page press series. The Manroland REGIOMAN Micro-gap\* press opens up a new technical and economical perspective for newspaper printing in terms of higher productivity, flexibility and efficiency.

A special advantage offered by this new system is reduced blanket installation and maintenance time. The dayGraphica RM70 blanket requires no torquing when mounting, and no need for further tensioning throughout the life of the printing blanket.

The dayGraphica RM70 blanket is precision engineered and designed to reduce the non-printing gap of the blanket cylinder.

\* Micro-gap is a registered trademark of Manroland. Flint Group gratefully acknowledges the help of Manroland in the development of this product.

### Features

Combination of innovative cylinder and blanket design.

Optimized web feed properties.

Enhanced compressible layer.

### Benefits

Faster press speed, better print quality, increased image area, reduced press down-time, eliminates A-B registration problems, increased gauge stability.

Excellent registration and web control.

Superior smash resistance and extended performance life on press.

### Specifications

**Colour:**

Brown

**Surface:**

Ground

**Thickness:**

1.75mm

**Hardness:**

78° Shore A

**Compressibility:**

0.18mm @ 1060 kPa Typical

**Face Compound:**

Solvent resistant rubber blend

## Optimise your on-press performance

Over the years, Flint Group's printing technologists and pressroom chemists have learned the dynamics between printing blankets, inks and pressroom chemicals play a vital role in on-press performance and profitability. And they've learned how to analyse these dynamics to help printers resolve problems and optimise their printing results.

Our laboratory experts, technical support team and sales consultants work together with printers to recommend the right combination of pressroom products to achieve optimum performance. A consultative service offered only by Flint Group.
