Varn® Apollo 885
Web Conditioner Designed for Coated Papers at High Speeds

Web Conditioner

Varn® Apollo 885 is designed with built-in antistatic properties and improved marking protection for medium to heavier coated sheets. This allows operators to control delivery of printed product at press speeds from 1,000 to 3,000 fpm.

Advantages of Varn® Apollo 885

- Prevents marking and static at higher speeds
- Enables better process management with conductivity tracers

HEATSET.
Varn® Apollo 885
Web Conditioner Designed for Coated Papers at High Speeds

Specifications:
Physical State: Liquid
Color: White to off white
Odor: none - very faint
Solubility in water: Emulsifies
pH ~ 7.85
µhos ~ 90 per ounce over water
Volatile Organic Chemicals % by wt: 0.15
VOC lb/gal: 0.01
Specific Gravity: .99
Bulk Density (lbs/gal): 8.25
Bulk Density (kg/l): 0.99

Directions:
Start at 5 ounces per gallon of water to prevent streaking, marking, to eliminate static problems. Add product at one ounce per gallon for more difficult marking and static problems. For precise measurement of dosage, check conductivity in the mixing reservoir. Product is designed to have a conductivity of 90 micromhos / oz per gallon of water.

Packaging:
U.S.A.
5 gallon pail
55 gallon drum
275 gallon tote
