

Varn CtP Sheetfed Fount

Universal CtP fountain solution

Varn CtP Sheetfed Fount is a specifically formulated fount solution to meet the needs and requirements of modern CtP technology.

Varn CtP Sheetfed Fount is a buffered fount concentrate incorporating unique desensitising agents and effective lubricants to provide a film of dampening solution that minimises the effects of mechanical plate wear.

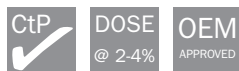

Varn CtP Sheetfed Fount allows for the reduction of IPA in dampening solution, which in some cases has attributed to chemical related image attack.

Features	Advantages	Benefits	Product Benefits
Formulated to reduce plate wear.	Longer run lengths. Prolong plate life.	Increased productivity. Less downtime due to plate re-makes.	<ul style="list-style-type: none"> • For use with CtP or conventional pre-sensitised plate material. • Reduces problems associated with CtP run lengths and image attack. • Improved desensitising properties. • Alcohol reduced or eliminated. • Optimises ink/water balance.
Alcohol reduction.	Lessens chance of chemical plate attack. Effective ink/water balance.	Cost saving. Environmentally responsible.	
Compatible with the majority of plates, inks, substrates and water conditions.	Increased flexibility in choice of consumables.	Cost savings.	

Directions for use

For optimum economy and performance use in conjunction with Varn Graphic Arts Doser DI-150. Dosage between 2 and 4% depending on local water conditions.
