Novaset® 4404/40 PREMIUM SILK MATT

High quality low-migration silk matt coating for commercial and food packaging printing

Water-based coating for sheetfed offset

Product features

• Novaset® 4404/40 PREMIUM SILK MATT is an extremely low-odour and low-migration water-based coating which has been developed specially for non-food packaging and commercial printing. It is also suitable for the coating of the outside of food and semi-luxury food packaging applications and offers very fast drying and superior rub protection.

• Further advantages of Novaset® 4404/40 PREMIUM SILK MATT are superior anti-sealing and stacking properties as well as very good silk matt effect.

• Depending on the used substrate Novaset® 4404/40 PREMIUM SILK MATT is also suitable for double-sided coating, we recommend carrying out your own tests before starting a print run.

• Novaset® 4404/40 PREMIUM SILK MATT is particularly suited for the production of packaging that complies with the requirements of the EU-regulation 1935/2004 and 2023/2006 as well as with the Swiss Ordinance 817.023.21. Mineral oil is not used as an intentional formulation component of this coating.

Advantages of Novaset® 4404/40 PREMIUM SILK MATT

• Extremely low-migration and low-odour.
• Suitable for indirect contact with solid and fatty food.
• Complies with the requirements for water-based coatings for food packaging.
• Suitable for non-absorbent and very high-absorbent substrates.
• High wet blocking resistance.
• Very good temperature resistance.
• Superior rub protection.
• Very good anti-sealing properties.
• Universal applicability.

1 = Characteristic weakly expressed  7 = Characteristic strongly expressed

The assessment of the product properties was made under standardised printing conditions. In individual cases, under special conditions, as in printing with very thick layers of coating, the classification of certain properties may be different.

Product code   VP30-044D-####
Final 4 digits relate to pack size.

Pack sizes   125 kg (01MA), 220 kg (01NF), 1000 kg (01U0)

Substrates   Very well suited for coated paper and board as well as non-absorbent and high-absorbent substrates, (offset paper).

Application   Sheetfed coating units

Film weight   3 – 6 g/m² wet application

Drying   Physical, forced with hot air-dryer and IR-dryer

Viscosity   40 s / 4 mm DIN cup / 20°C

Cleaning   Please clean up machine and equipment immediately with water.

Remarks   Stir well before use!
Only use coatable printing inks!
Resistance against alcohol and alkali required.

Storage   Protect against frost, heat and direct sunlight.
Storage in original packaging at 5° to 30°C Celsius.

Version: 22.03.2018   Page 2 of 3
In order to preserve low-odour and low-migration properties, no additives such as retarders, defoamers or others may be added to the coating. An exemption to this rule is the addition of water to adjust the viscosity. It must be generally noted, that for the production of food packaging only materials suitable for this area of application are used.

In cases where a non-low-migration water-based coating has been used before printing with Novaset® 4404/40 PREMIUM SILK MATT, the printing press should be thoroughly cleaned taking care to remove all coating residues. For this purpose, if necessary, only washes suitable for low-migration printing should be used, taking into account the manufacturers recommendations for use. Following the wash cycle, thorough rinsing with clean water is essential.

Novaset® 4404/40 PREMIUM SILK MATT is ISEGA-certificated. We will gladly provide you with a copy of the certificate upon request.

For further information please refer to our Technical Reviews „Resistance requirements for surface finishing”, „Good manufacturing practice food packages” and the EuPIA guideline “Printing inks for food packaging”.
