Novaset® 4730/60 ANTI SLIP GLOSS
High quality low-migration anti-slip coating for commercial and food packaging printing

Water-based coating for sheetfed offset

Product features

- Novaset® 4730/60 ANTI SLIP GLOSS is a particularly low-odour and low-migration water-based coating which has been developed specially for non-food packaging and commercial printing. It is also suitable for the coating the outside of food and semi-luxury food packaging applications and offers fast drying and good rub protection.

- Further advantages of Novaset® 4730/60 ANTI SLIP GLOSS are good anti-sealing and stacking properties as well as high gloss.

- Novaset® 4730/60 ANTI SLIP GLOSS is suitable for one-sided coating.

- Novaset® 4730/60 ANTI SLIP GLOSS is particularly suited for the production of packaging that complies with the requirements of the EU-regulation 1935/2004 and 2023/2006 as well as with the Swiss Ordinance 817.023.21. Mineral oil is not used as an intentional formulation component of this coating.

Advantages of Novaset® 4730/60 ANTI SLIP GLOSS

- Particularly low-migration and low-odour.
- Suitable for indirect contact with solid and fatty food.
- Complies with the requirements for water-based coatings for food packaging.
- Good rub protection.
- High gloss.
- Good anti-sealing properties.
- Very good anti-slip effect.

1 = Characteristic weakly expressed  7 = Characteristic strongly expressed

The assessment of the product properties was made under standardised printing conditions. In individual cases, under special conditions, as in printing with very heavy coverage of coating, the classification of certain properties may be different.

Product code
VP30-04CD-#### – (Final 4 digits relate to pack size.)

Pack sizes
125 kg (01MA), 220 kg (01NF), 1000 kg (01U0)

Substrates
Very well suited for coated paper and board.

Application
Sheetfed coating units

Film weight
3 – 6 g/m² wet application

Drying
Physical, forced with hot air-dryer and IR-dryer

Viscosity
60 s / 4 mm DIN cup / 20°C

Cleaning
Please clean up machine and equipment immediately with water.

Remarks
Stir well before use!
Only use coatable printing inks!
Resistance against alcohol and alkali required.

Storage
Protect against frost, heat and direct sunlight.
Storage in original packaging at 5° to 30°C Celsius.

You are welcome to contact us for further information.
In order to preserve low-odour and low-migration properties, no additives such as retarders, defoamers or others may be added to the coating. An exemption to this rule is the addition of water to adjust the viscosity. It must be generally noted, that for the production of food packaging only materials suitable for this area of application are used.

In cases where a non-low-migration water-based coating has been used before printing with Novaset® 4730/60 ANTI SLIP GLOSS, the printing press should be thoroughly cleaned taking care to remove all coating residues. For this purpose, if necessary, only washes suitable for low-migration printing should be used, taking into account the manufacturer’s recommendations for use. Following the wash cycle, thorough rinsing with clean water is essential.

For further information please refer to our Technical Reviews “Resistance requirements for surface finishing”, “Good manufacturing practice food packages” and the EuPIA guideline “Printing inks for food packaging”.
