nyloprint[®] poly chablon plates

Water washable chablon plates for security and banknote printing

Product features

- Used for inking-up the gravure cylinders in intaglio printing presses
- Improves the accuracy and print quality especially in high security printing (e.g. bank notes, shares, passports, stamps, etc.)
- Development based on many years of experience in security printing and in close cooperation with users
- Water washable plates – only pure tap water is needed
- Optimal ink transfer due to soft relief layer
- High contrast colour change after exposure gives additional security in the assessment of the plate quality even before washout process

Advantages of nyloprint[®] WS 230 S Digital

- **Higher print quality**
 - For highest dimension stability
 - No defects caused by dust and damaged films
 - No data loss during transfer
 - Smoother plate surface can achieve higher density
 - Highly consistent especially when repeating plate processing
- **Cost effective and environmentally friendly**
 - No film costs
 - Electronic filing of graphics, film storage is redundant
 - Easy and fast data exchange – worldwide

Comparison of nyloprint[®] digital plate versus nyloprint[®] conventional plate

nyloprint[®] poly chablon plates consist of a light sensitive photopolymer layer bonded to steel.

³ All processing parameters depend on, among others, the processing equipment and lamp age. The above mentioned processing parameters were established under optimum conditions on nyloprint® processing equipment. Under other conditions the processing times can differ from these. Therefore the above mentioned values are only to be used as a guide.

Suitable equipment

The nyloprint® WS plates can be processed with nyloprint® processing equipment and all similar devices. The nyloprint® WS-S Digital can be used with all IR-laser systems suitable for imaging letterpress plates. For washout the use of brushes in the washer is recommended.

Washout medium

For washout only pure tap water is needed.
