

dayGraphica 8897

Breeze through demanding press runs

dayGraphica 8897's specially designed durable carcass and superior print surface meets the rigorous demands of a newspaper pressroom. dayGraphica 8897 runs great on double - and single width presses, this versatile packed blanket can also be used in a no-pack mode. On certain presses this means longer life, less down time and better printing quality on press, giving you higher productivity, lower operating costs, maximum profitability and no missed deadlines.

The patented closed cell compressible layer gives the dayGraphica 8897 precise and even printing pressure - across the entire printing surface. It is engineered for unsurpassed resistance to smashes and to wraps, to keep you running without blanket changes. And it offers great rebound, too. The ground surface carries the proper amount of ink for newspaper printing and you can expect dayGraphica 8897 to meet your quality standards for contrast values, dot gain and density.

Features	Benefits	Specifications
Highly ground surface.	Uniform gauge and consistency. Ideal texture for carrying and transferring ink. Maximum release characteristics. Precise printability. Fewer stops for retensioning and longer blanket life.	Colour: Brown Surface: Ground Thickness: 1.95mm Hardness: 78° Shore A Compressibility: 0.13mm @ 1060 kPa Typical 0.18mm @ 2060 kPa Typical Elongation: <0.70% @ 10 N/mm Tensile Strength: >60 N/mm Face Compound: Solvent resistant rubber blend
Compatible rubber surface compound.	Solvent resistant. Excellent abrasion resistance. Excellent release characteristics. More consistent feed characteristics.	
Durability engineered carcass.	High density carcass prevents gauge loss and provides long life.	
Patented closed-cell compressible layer.	Enables blanket to achieve precise and even printing pressure across entire printing surface. Maximum smash resistance. Key factor in blanket durability. Rebounds quickly.	
Application versatility.	Designed to allow flexibility in packing requirements.	

Optimise your on-press performance

Over the years, Flint Group's printing technologists and pressroom chemists have learned the dynamics between printing blankets, inks and pressroom chemicals play a vital role in on-press performance and profitability. And they've learned how to analyse these dynamics to help printers resolve problems and optimise their printing results.

Our laboratory experts, technical support team and sales consultants work together with printers to recommend the right combination of pressroom products to achieve optimum performance. A consultative service offered only by Flint Group.
