## Specially designed for presses employing metal backed blankets

Metalback blankets are increasingly used on high-speed newspaper presses where the ease of installation and on press stability adds to the benefits of high quality print and minimum paper wastage.

DuraZone compressible layer technology ensures that the already extended life of blankets in this application is improved still further, whilst maintaining print quality standards where dense solids and sharp halftones are high on the list of 'must haves'. DuraZone technology ensures that once the specified characteristics have been determined, they can be reproduced time and again to ensure consistency of performance.

Predictable web feed and precise colour registration and are also essential to ensure presses run with reduced waste copy and minimum stress and power consumption on the drive motors.

### Features

Proven blanket technology securely mounted onto metal base.

Optimized web feed properties.

Enhanced DuraZone compressible layer.

### Benefits

Quicker fitting, no re-tensioning, eliminates A-B copy variances, long life on press.

Close register on wide webs and through speed changes, excellent web tension control.

Superior smash resistance for longer life, optimum performance in halftones and solids.

### Specifications

**Colour:**

Tan

**Surface:**

Ground

**Thickness:**

1.75mm

**Hardness:**

78° Shore A

**Compressibility:**

0.18mm @ 1060 kpa Typical

**Face Compound:**

Solvent resistant rubber blend

## Optimise your on-press performance

Over the years, Day's printing technologists and pressroom chemists have learned the dynamics between printing blankets and pressroom chemicals play a vital role in on-press performance and profitability. And they've learned how to analyse these dynamics to help printers resolve problems and optimise their printing results.

Day's laboratory experts, technical support team and sales consultants work together with printers to recommend the right combination of pressroom chemicals and printing blankets to achieve optimum performance. A consultative service offered only by Day International.
